

AI IMPLEMENTATION

Advisory + AI Implementation

AI employees working one workflow on your connected tools, with your team trained to review them.

\$4,500 /month

3-month term, no onboarding fee.

Or month-to-month: a one-time \$3,000 onboarding fee, and 30 days' notice to cancel.

AI Implementation puts AI employees to work on one workflow, in the tools you already use. Over three months we connect your tools, redesign the workflow around a review queue, and train your team to approve AI work quickly. The advisory is part of the price.

Every month

- ✓ A weekly 60-minute working session
- ✓ Up to 8 implementation hours

6 deliverables by month 3

- 1 Connected tools
- 2 One redesigned workflow
- 3 AI employees at work
- 4 Staff training and AI use policy
- 5 Permission register
- 6 Results report

It's for you if

- ✓ Your tools are fine, but one workflow still waits on people doing the first draft
- ✓ You want AI doing real work, with your team approving every piece
- ✓ You can give us a weekly hour and someone who knows the workflow

It's not for you if

- You need a custom app or module. That's Custom Build.

What you get, one by one

1

Connected tools

The tools you already use, connected so your AI employees can read from them and draft in them.

We connect the tools the workflow already runs on, such as your CRM, inbox, and documents, with only the access the job needs. Each connection is listed in the permission register.

You receive: Working connections, each one in the permission register.

2

One redesigned workflow

Written down: what AI drafts, who reviews it, and what it never does.

We write the workflow down as it will run with AI: which steps AI drafts, who reviews each one, what AI may never do, and what happens when something goes wrong.

You receive: A written workflow your team follows.

3

AI employees at work

Drafting real work in a review queue that your team approves.

Your AI employees take the first pass at real work and put each draft in a review queue. Your team approves, edits, or rejects it, and nothing goes out without a person.

You receive: AI employees running in your tools, with a review queue.

4

Staff training and AI use policy

Your team trained to review AI work fast, and a written policy for how they use AI.

Training on how to review AI work quickly and well, and a written policy on which AI tools staff may use, with which data, on which accounts.

You receive: Training sessions and a written AI use policy.

5

Permission register

What AI can read and do, and who approved it.

One register of every AI connection: what it can read, what it can do, and who approved it. It's updated whenever access changes.

You receive: A permission register you keep.

6

Results report

The workflow measured against the baseline from your Sprint.

In month 3 we measure the workflow again against the baseline from your Sprint, and report what changed and where each number came from.

You receive: A written results report.

2 · MONTH BY MONTH

How the three months run

MONTH 1

Connect it

Your tools connected, the workflow redesigned, and the permission register started.

MONTH 2

Run it

Your AI employees drafting real work in the review queue, and your staff trained to review it.

MONTH 3

Prove it

The workflow running end to end, and the results report against your Sprint baseline.

3 · WHAT WE NEED FROM YOU

Your part

- ✓ The weekly 60-minute working session
- ✓ One person who owns the workflow and reviews the first drafts
- ✓ Access to the tools you choose to connect
- ✓ Approval of each connection before it goes live

4 · HOW IT STARTS

Every plan starts with the \$1,000 Sprint

The AI Operations Sprint is one week on one workflow: we map it, measure it, and finish one piece of the fix with you. Its readout tells you whether this plan fits, or that you don't need one. Seven deliverables, in writing, covered by the All-Seven Guarantee.

The full \$1,000 is credited to your first month when you:

- 1 Submit the pre-work within 48 hours of booking
- 2 Attend both live sessions
- 3 Start a monthly plan within 30 days of the readout

5 · THE TERMS, IN PLAIN WORDS

The fine print

Term	3-month term, no onboarding fee. Or month-to-month: a one-time \$3,000 onboarding fee, and 30 days' notice to cancel.
Refunds	Full refund within 3 days of your first payment. After that the work has started, and the 3-month term stands. Month-to-month instead: full refund, onboarding fee included, within 3 days of your first payment. After that the work has started, and the month in progress isn't refunded.
Not included	Custom app builds. If you need one, step up to Custom Build.
Unused hours	Hours are a cap, not a bank. They don't roll over. We plan every month around the named outcome.
Extra hours	Quoted in 5-hour blocks, agreed in writing before the work.
Third-party costs	Licenses, AI usage, and hosting are billed to you directly.
Ownership	Accounts and credentials are held in your business's name. Ownership terms for code and reusable components are set in your written agreement.
Changing plans	Step up anytime. Step down or pause at the end of a term with 30 days' notice.

When the three months are done

Your handoff package recommends an AI Ops Reliability tier for what we launched. For this plan that's usually **Watch**, at \$1,000 a month: monitoring, AI output checks, cost reports, and fix hours, month-to-month. It's optional, and you pick the tier. See every tier at corporatesynergysolutions.com/plans.
