

CUSTOM BUILD

Advisory + Custom Build

One custom operating system live, connected, and monitored.

\$7,500 /month

3-month term, no onboarding fee.

Or month-to-month: a one-time \$5,000 onboarding fee, and 30 days' notice to cancel.

Custom Build is for the workflow your off-the-shelf tools can't run. Over three months we design one custom app or module with you, build it in weekly working sessions, and put it live with your AI employees connected to it. The advisory is part of the price, so the decisions around the build get made as it goes.

Every month

- ✓ A weekly 60-minute working session
- ✓ Up to 20 build hours

6 deliverables by month 3

- 1 Envisioning Workshop
- 2 Build plan and first AI employee
- 3 Your custom app or module
- 4 Staff and admin training
- 5 Launch report
- 6 Handoff package

It's for you if

- ✓ One core workflow has outgrown spreadsheets and off-the-shelf tools
- ✓ You want the system and its data in accounts you own
- ✓ You can give us a weekly hour and someone who knows the workflow

It's not for you if

- Your tools already do the job. AI Implementation connects AI employees to them for less.
- You want several systems built at once. The plan builds one, and the Envisioning Workshop says in writing if the scope needs more.

What you get, one by one

1

Envisioning Workshop

Weeks 1–2. What we build, where your data lives, and what “done” means, agreed in writing.

Working sessions with you and the people who run the workflow. We walk the work as it runs today, decide what the system must do and what it won't, and pin down where each piece of data lives. Nothing is built until you sign off on the scope.

You receive: A written scope with the definition of done, signed off by you.

2

Build plan and first AI employee

Weeks 3–4. The plan for the build, and an AI employee drafting work for your team to approve.

The build plan breaks the app into the pieces we ship each week, in order, with the check each piece must pass. While the app is built, your first AI employee starts on one job in your existing tools and drafts work into a review queue.

You receive: The build plan, and an AI employee working in a review queue.

3

Your custom app or module

Months 2–3. Live for one workflow, with a connector so your AI employees can use it.

Built in the weekly working sessions and tested against your real examples, with private details removed. It goes live for one workflow, with a connector your AI employees use to read and update it.

You receive: A working app in accounts you own, live for one workflow.

4

Staff and admin training

Your team trained to run it, with recordings and guides.

Live training for the people who use the app every day, and for the admins who manage users, roles, and settings. Every session is recorded.

You receive: Recordings and written guides for staff and admins.

5

Launch report

The results of the AI output checks we ran before go-live.

Before go-live we run the AI output checks against real examples and write down what passed, what we fixed, and what a person still reviews.

You receive: A written launch report.

6

Handoff package

Accounts, credentials, and guides in your business's name, plus the Reliability tier we recommend.

What you need to run the system, change it, or hand it to someone else: accounts and credentials in your business's name, the guides, and the Reliability tier we recommend for what we launched. Ownership terms for code and reusable components are set in your written agreement.

You receive: A handoff package and a Reliability recommendation.

2 · MONTH BY MONTH**How the three months run****MONTH 1****Design it**

The Envisioning Workshop, the build plan, and your first AI employee drafting work.

MONTH 2**Build it**

Your app built in weekly working sessions and tested against your real examples.

MONTH 3**Launch it**

Live for one workflow, staff and admins trained, the launch report, and the handoff package.

3 · WHAT WE NEED FROM YOU**Your part**

- ✓ The weekly 60-minute working session
- ✓ One person who owns the workflow and can answer questions between sessions
- ✓ Access to the tools involved, and a few real examples to test against
- ✓ Sign-off on the scope before the build starts

4 · HOW IT STARTS

Every plan starts with the \$1,000 Sprint

The AI Operations Sprint is one week on one workflow: we map it, measure it, and finish one piece of the fix with you. Its readout tells you whether this plan fits, or that you don't need one. Seven deliverables, in writing, covered by the All-Seven Guarantee.

The full \$1,000 is credited to your first month when you:

- 1 Submit the pre-work within 48 hours of booking
- 2 Attend both live sessions
- 3 Start a monthly plan within 30 days of the readout

5 · THE TERMS, IN PLAIN WORDS

The fine print

Term	3-month term, no onboarding fee. Or month-to-month: a one-time \$5,000 onboarding fee, and 30 days' notice to cancel.
Refunds	Full refund within 3 days of your first payment. After that the work has started, and the 3-month term stands. Month-to-month instead: full refund, onboarding fee included, within 3 days of your first payment. After that the work has started, and the month in progress isn't refunded.
Built in	One source of truth for your data, roles and permissions, recovery when a step fails, a person approving AI work before it goes out, AI output checks, logs, and cost tracking.
Capacity	Limited to a few clients at a time.
Unused hours	Hours are a cap, not a bank. They don't roll over. We plan every month around the named outcome.
Extra hours	Quoted in 5-hour blocks, agreed in writing before the work.
Third-party costs	Licenses, AI usage, and hosting are billed to you directly.
Ownership	Accounts and credentials are held in your business's name. Ownership terms for code and reusable components are set in your written agreement.
Changing plans	Step up anytime. Step down or pause at the end of a term with 30 days' notice.

When the three months are done

Your handoff package recommends an AI Ops Reliability tier for what we launched. For this plan that's usually **Maintain**, at \$2,500 a month: monitoring, AI output checks, cost reports, and fix hours, month-to-month. It's optional, and you pick the tier. See every tier at corporatesynergysolutions.com/plans.
