AI EMPLOYEES · ONE TIME

AI Employees

An AI employee is a trained agent with one clear job. It knows your business, remembers your customers, follows your rules and uses your tools. AI employees work in small teams, and a person you trust stays in charge of every decision that matters.

$1,500–$15,000
one time, by size

SIZES	BEFORE THE BUILD	TO RUN THEM	PAYMENT
Starter Crew, Team, Department	A free scope call. A Department starts with the $1,000 Diagnostic	Care: $100 per AI employee a month	In full, 50/50, or thirds

THE THREE SIZES

Priced by how many AI employees one person manages:

- ✓ Starter Crew: up to 3 AI employees, $1,500–$3,000 one time
- ✓ Team: 4 to 10 AI employees, $3,500–$7,500 one time
- ✓ Department: 11 to 20 AI employees, $8,000–$15,000 one time

The ceiling is 20, because past that one person can't oversee the work well. The price per AI employee drops as the team grows, because knowledge, memory and rules are shared.

IS THIS THE RIGHT SIZE?

Need portals for clients or partners, different roles, or teams handing work to each other on one system? Consider a Business Platform ($20,000–$50,000).

EVERY AI EMPLOYEE IS BUILT FROM THE SAME SEVEN PARTS

- **The job to be done.** The specific task it owns and what "done" looks like.
- **Knowledge.** The documents, data and context it works from.
- **Memory.** What it keeps between tasks so it improves and stays consistent.
- **Skills.** The specific abilities it needs to do the job.
- **Instructions and rules.** How it should work, and what it must never do.
- **Browser capability (when needed).** Working on websites the way a person would.
- **The harness.** The AI platform it runs on, such as Claude, Gemini, OpenAI, or a mix.
