AFTER LAUNCH

Self-Hosted Handoff

Your accounts and data are yours from day one. Once the work is complete and paid for, we transfer the custom application to you, and you host and maintain it. Help is $350/hour as needed.

IT FITS WHEN YOUR TEAM CAN TAKE ON

What Synergy Care would otherwise do:

- ✓ Hosting the app and its database
- ✓ Daily backups and recovery
- ✓ Watching connected services and fixing a connection when an outside API changes or fails
- ✓ Switching AI models and recalibrating prompts when a provider retires a model
- ✓ Monthly security and dependency patching

IS THIS THE RIGHT SIZE?

Rather not run servers or watch for API changes? Synergy Care ($495 a month) does it, with an hour of tweaks.

WHAT YOU GET

- Your accounts and data are yours from day one.
- When the work is complete and paid for, the custom application is transferred to you.
- We keep our own tools and know-how, and you get a permanent license to any that ship inside your app.
- You may hire us to manage or extend it later, but you don't have to.

THE TERMS

- On a Self-Hosted Handoff, hosting and your own usage bills from outside services, such as AI usage, text messages and email volume, are yours.
- Every build still includes 30 days of Synergy Care after launch before the handoff.
- On a financed build you can run it yourself from launch under a license. Ownership transfers with your final payment.
