AFTER LAUNCH · MONTH TO MONTH

# Synergy Evolve

Once your team uses the system every day, they'll have ideas every week. Evolve includes everything in Care, plus engineering time every month to build new features, reports, and automations without a new contract each time.

**$1,250**
a month

| TERM | INCLUDED TIME | BACKUPS | SUPPORT |
|---|---|---|---|
| Month-to-month | 4 hours a month, up to 2 roll over | Daily, 30 days of recovery | Shared channel, same business day |

## BEST FOR

✓ Team System, Operations System, and Business Platform builds

### IS THIS THE RIGHT SIZE?

Only need it kept running and patched, with an hour of tweaks? Synergy Care ($495 a month).

Synergy Evolve improves one system we built. Direct Advisory is senior advice across your business and tools. A Partnership Tier doesn't host your software: if we host it, keep Synergy Care alongside your tier, and your tier's hours replace Synergy Evolve's.

## WHAT'S INCLUDED

- Managed hosting for the app and its database, up to standard business use
- Daily automated backups, with 30 days of point-in-time recovery
- API and webhook monitoring: when a connected service changes or fails, we're alerted and we fix the connection
- AI model and prompt upkeep: when a provider retires a model or changes how it behaves, we switch models and recalibrate prompts so your outputs stay consistent
- Monthly security and dependency patching
- 4 hours a month of engineering for new features: a new dashboard, an overdue-invoice reminder, a new training module, or a new lead source.
- Up to 2 unused hours roll over to the next month, never more than 6 in one month.
- A 30-minute roadmap sync each month to review usage and AI accuracy and pick the next improvement
- One planned release each month, agreed at the sync. Urgent bugs are fixed as they come up.
- A shared Slack or Teams channel, answered the same business day
- 15% off every Module
- A 4-hour response to a critical outage during business hours

## WHAT THE MONTHLY HOURS GO TO

**New features**

For example a new dashboard, an overdue-invoice reminder, a new training module, or a new lead source.

## HOW IT COMPARES

| | Self-Hosted Handoff | Synergy Care | Synergy Evolve |
|---|---|---|---|
| Monthly price | $0 a month | $495 a month | **$1,250 a month** |
| Code and IP ownership | Yours, in full | Yours, in full | **Yours, in full** |
| Managed hosting and database | You manage it | Included | **Included** |
| Daily automated backups | You manage them | 14 days of recovery | **30 days of recovery** |
| API and webhook error monitoring | — | Included, around the clock | **Included, around the clock** |
| AI model updates and prompt calibration | — | Included | **Included** |
| Included hours a month | None ($350/hour as needed) | 1 hour of quick tweaks | **4 hours of new features and screens** |
| Unused hours | — | Don't roll over | **Up to 2 roll over, 6 a month at most** |
| Support and response time | Email, as available | Support portal, next business day | **Shared Slack or Teams channel, same business day** |
| Roadmap sync | — | — | **30 minutes a month** |
| Modules | Full price | Full price | **15% off** |

## THE TERMS

- Every build includes 30 days of Synergy Care after launch, then you choose Synergy Care, Synergy Evolve or a Self-Hosted Handoff.
- Hosting is included up to standard business use, for example 25 GB of database storage and standard compute.
- Past standard use (for example 25 GB of storage), the provider's extra charge bills to your card. We'll tell you before you reach it.
- Your own usage bills from outside services, such as AI usage, text messages, and email volume, stay on your card.
- If our code has a bug or a connection token expires, Care fixes it. A new workflow step, or a change you make to an outside account, uses your included time or becomes a Module.
